The Environmental Concerns Committee of the American Fisheries Society published this in June, the paper focuses on the need for mine reform of an ancient law that still governs mining on Federal lands in the US, lands that belong to you, the taxpayer.

Note a few changes that did not make it into press, one is that the reference to the Pebble Prospect in SW Alaska indicates it is about 7 billion tons, now it is estimated at 10.78 billion tons.

Thankyou,

Carol Ann Woody, Ph.D.
